EVERSTART

is a decentralized service similar to popular crowdfunding sites.

ACTIVE INCOME (REFERRAL PROGRAM)

Anyone can make money with EverClub - it's easy and simple! In order to start it is enough to invite anyone to register in EverClub ecosystem.

The system provides for the distribution of funds directly from new participants to old ones. It does not matter who exactly invited these users, only their serial number is important.

From each invited participant, the referral receives **90%** of the "platform price" for each platform purchased by him. This will allow the user to earn **from \$9 to \$56,000** per referral, depending on the number of platforms they buy.

The passive income system is built in such a way that having received the funds, they were enough to open the next level.

ACTIVE INCOME (REFERRAL PROGRAM)

Level	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1 People TRX	90	45	90	180	450	720	2250	2700	4500	9000	13500	36000	72000	144000	288000
10 People TRX	900	450	900	1800	4500	7200	22500	27000	45000	90000	135000	360000	720000	1440000	2880000

PASSIVE INCOME

- Start of development of the own highly scalable Blockchain
- Negotiations for the integration of the University into the existing metauniverses

5 MAIN REASONS TO CHOOSE THE EVERCLUB PLATFORM

Transparency

The EverClub platform only charges 10 percent in commission for all transactions. Therefore, 90 percent of all funds in circulation belongs to participants and EverClub does not have access to these funds, which consequently makes rugpulling impossible.

This fact and the lack of prerequisite of inviting people distinguishes EverClub from other MLM structures and Ponzi schemes, whose fundamental task is to raise as many users funds as possible and then abscond with them. With EverClub your funds are safe and we are very transparent with our low commissions which will be used for marketing, salaries and future updates of the platform.

Open Code

The open code of the platform is publicly accessible to anyone interested in learning and auditing.

All platform processes are managed and regulated by smart contracts.

The utilization of special algorithms enables to automate of all processes to the maximum and minimizes the theoretical possibility of errors due to the human factor. In addition, it will help to achieve full automatization and decentralization of the platform.

Decentralisation

EverClub platform is fully decentralized and built using blockchain technology.

EverClub utilizes technical opportunities of the TRON network blockchain. This decision allows us to make all the processes to be open and transparent and provides a superior level of decentralization and safety.

Security

All users' data, funds, and registration information are securely protected from hacking and leakage. The terms and conditions are conducted by a smart contract based on blockchain, which cannot be rigged due to the decentralized system of data storage.

We have a team of security specialists who are monitoring the servers 24/7 and making sure the platform is safe from potential malicious attacks.

Exclusivity

Our main priority is customer focus. We have carefully examined the experience of other projects presented on the market; we took the best of DeFi and NFT projects; integrated info business, education and finances; and subsequently got a symbiosis with unique and exclusive functionality.

- ✓ With no payment delays: as soon as funds become available, the system transfers them to the account, mentioned in the contract.
- ✓ With open and transparent relations between the parties. Before contracting, each participant can get acquainted with its conditions.
- ✓ With no hidden commissions and other unpleasant details, which is a common sin of decentralized investing companies.

PERFORMANCE METRICS FOR SOCIAL MEDIA MARKETING

MULTIPLE COUNTRIES TARGET ADVERTISEMENT:

POPULAR WORLDWIDE MEDIA ADVERTISEMENT:

ACCORDING TO STATISTICS, 60% OF USERS BUY MORE THAN 5 LEVELS IN THE FIRST WEEK.

DISCLAIMER
