# WHAT IS LEARN2EARN?

The modern crypto industry has launched a trend for various services that reward their users for doing something: from completely useless (Play 2 Earn) to fitness incentives (Move 2 Earn). The EverClub platform decided to combine the opportunity to make money with the opportunity to gain new knowledge (Learn 2 Earn). What can be better than an opportunity to get new knowledge or improve existing skills in a game form and as an additional motivation to get rewarded for it in the form of cryptocurrency. That sounds great to me!

## HOW DO I EARN LEARNING?

Mostly, people buy courses from educational platforms that keep courses costs as the profit. EverClub is not about selling and earning but paying. With the active use of the platform, the cost of the course for the user is reduced by more than 3 times. The rest is paid out. Thus, our members can peacefully concentrate on studying without thinking of how to survive tomorrow as well as networking, making friends, forming teams etc.

## HOW DOES IT WORK?

Gamification – the initial course about crypto is divided into 15 levels which makes it feel like a game. The higher your level, the higher the reward and the more difficult the lesson.

# LEVEL PRICE IS DIVIDED INTO 2 PARTS

- Price of Activation of the cell (PA) - 70% of which goes from new member to old members- passive income;
- Price of the Cell itself (PC) - 5t0% of which goes to you referal who invited you- active income

<b>Level 1</b> 20 BUSD 3 lessons	<b>Level 2</b> 21 BUSD 2 lessons	<b>Level 3</b> 37 BUSD 2 lessons	<b>Level 4</b> 67 BUSD 2 lessons	<b>Level 5</b> 121 BUSD 2 lessons
<b>Level 6</b> 219 BUSD 2 lessons	<b>Level 7</b> 398 BUSD 2 lessons	<b>Level 8</b> 726 BUSD 2 lessons	<b>Level 9</b> 1 332 BUSD 2 lessons	<b>Level 10</b> 2 458 BUSD 2 lessons
<b>Level 11</b> 4 566 BUSD 2 lessons	<b>Level 12</b> 8 540 BUSD 2 lessons	<b>Level 13</b> 16 087 BUSD 2 lessons	<b>Level 14</b> 30 526 BUSD 2 lessons	<b>Level 15</b> 58 355 BUSD 2 lessons

BUSD (Binance USD) is a stabelcoin issued in the form of a BEP20 token on the BNB Smart Chain blockchain.

1 BUSD = 1\$

# PASSIVE INCOME

## One-Level Marketing (Activation Price)

This system distributes funds directly to members from new members to old members.  
The system distributes funds according to the following principle:

- Each member is in a straight line behind each other, starting with id1 and following in order.
- When new users with id2, id3, id4 register in the system, then **70%** of their platform activation price goes to id1.

- After receiving 3 payments of **70%**, the system goes to the next user in order and repeats the process: now id2 will get **3 times 70%** from id5, id6, id7 and so on.

It does not matter who exactly invited these users, only their serial number is important. The passive income system is built in such a way that having received the funds, they are enough to open the next level.

# CALCULATION

Level	Price, BUSD	Profit (passive income), BUSD
1	20,00	21
2	21,00	37,80
3	37,00	67,20
4	67,00	121,80
5	121,00	220,50
6	219,00	401,10
7	398,00	732,90
8	726,00	1344
9	1332,00	2480,10
10	2458,00	4607,40
11	4566,00	8618,40
12	8540,00	16235,10
13	16087,00	30809,10
14	30526,00	58900,80
15	58355,00	113437,80

# REACTIVATION

After receiving three payouts for any of the platforms, a "Reactivate" button appears on it, and the re-entry price is reduced at that level (the platform price is paid only once when it is opened).

By reactivating the platform, the user logs back into the passive income system to the last place in the queue, now all he has to do is wait for the repeat 3 payments.

The platform can be reactivated an unlimited number of times.

Users with their own audience have the opportunity to receive regular income periodically reactivating the site (the number of reactivations is not limited). Income will be accrued from users connected to the site later and/or from users invited as part of the referral program.

# REFERRAL PROGRAM (PLATFORM PRICE)

Anyone can make money with EverClub - it's easy and simple! In order to start it is enough to invite anyone to register in EverClub ecosystem.

From each invited participant, the referral receives **50%** of the "platform price" for each platform purchased by him. This will allow the user to earn from **\$9 to \$56,000** per referral, depending on the number of platforms they buy.

The advantages are obvious: single line referral programme with "overflow" system allows you to receive income not only from your own investments, but also with the help of attracted partners, registered as referrals, who used the referral link.

For this purpose it is necessary to pass your referral code to all your friends before their registration.

Platform	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1 People BUSD	5	1,5	2,5	4,5	8	14	24,5	43	75,5	132	231	404,5	708	1239	2168,5
10 People BUSD	50	15	25	45	80	140	245	430	755	1320	2310	4045	7080	12390	21685

# OVERFLOW

This Smart Contract feature is automatic and occurs in the referral program money distribution system (active income) under the following conditions:

- The user buys a new platform and the system checks whether this platform is bought from the one who invited this user or not. If the platform is bought, the reward of 50% of the "platform price" goes to the inviter.
- If the user who invited the platform is not bought, the system will go up the chain (checks the next user, the one invited by the previous one, checked by the system) searching for the user who has bought the platform and will transfer the reward to him. Everyone who misses such remuneration will receive a notification from the system. In order to avoid under-receiving profits, it is recommended to buy several platforms and invest in the next level of platforms.

# TEAM LINK / EVERTEAM

An additional service within the platform that allows the largest and most active investors to increase their income using a team promotion strategy.

In the system, users can join teams and earn together.

Up to 50 people can be added to a team. Registered users in the profile can create their own team links, (generated manually or automatically).

The team link is distributed by team members to earn income together.

The advantage of teaming is that the payout for each new member who registers through the team link on the platform is adjusted for each user in the team in turn.
